Summary

Final-year Software Engineering undergraduate with strong foundations in Data Structures, Algorithms, and Object-Oriented Programming. Experienced in building scalable backend systems and AI-powered SaaS applications using Java, Node.js, and modern AI tools.

Education

Vellore Institute of Technology, Bhopal	Sep 2022 – April 2026
B.Tech in Computer Science and Engineering	
Noel School	May 2022
Class XII (Science)	
Noel School	May 2020
Class X	

Experience

LLM Intern	Jan 2026 – May 2026
<i>Ethara AI</i>	
• Annotated and validated large-scale text, image, and video datasets used for training and evaluating AI/LLM systems. • Executed image and video labelling tasks, maintaining data quality and annotation consistency across multiple projects. • Supported RLHF pipelines by assessing, ranking, and providing feedback on LLM-generated responses. • Collaborated with AI teams on data preparation, quality control, and model evaluation tasks to enhance model performance.	

Projects

Summatrix (AI-powered PDF SaaS)	2025
Next.js, OpenAI, LangChain, PostgreSQL	
• Built an AI-powered PDF summarisation platform using Next.js, OpenAI, and LangChain. • Implemented PDF upload, text extraction, and AI-generated summaries for long documents. • Added authentication, database integration, and responsive UI for better user experience. • Integrated semantic search with embeddings to improve document query and summary relevance.	
Meet AI (SaaS)	2025
Node.js, Express.js, PostgreSQL	
• Built backend APIs for a SaaS platform using Node.js, Express.js, and PostgreSQL. • Implemented JWT authentication and role-based access control (RBAC) for secure user access. • Designed modular API architecture to improve maintainability and scalability. • Optimised database queries and integrated PostgreSQL for efficient data management.	
Criminal Recognition System	2024
YOLO, OpenCV, Python	
• Built a real-time face recognition and detection system using YOLO and OpenCV. • Implemented image preprocessing and feature extraction techniques to improve detection accuracy. • Developed a low-latency recognition pipeline for real-time video stream processing. • Worked on model training, dataset handling, and optimisation for reliable face detection.	

Technical Skills

Languages: Java, Python, SQL, JavaScript, TypeScript
Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems
Backend: Node.js, Express.js, REST APIs, Authentication, Caching
Frontend: React.js, Next.js, HTML, CSS, Tailwind CSS
Databases: PostgreSQL, MongoDB, Neon DB, SQL Query Optimisation
Cloud & DevOps: AWS, GCP, CI/CD, GitHub Actions
AI & Automation: OpenAI API, LangChain, AI Chatbots, Prompt Engineering, n8n
Machine Learning: Machine Learning, Deep Learning, Natural Language Processing (NLP)
Computer Vision: OpenCV, YOLO

Certifications

- AWS Solutions Architect(ETHNUS)
- MongoDB DBA Associate
